

Why we at **Lab in the Sack Labradors**, highly recommend and believe in **Step Above Proteins**

There are two different formulas; **Human** is derived from Beef Hydrolysate or **Animal**, which is a Pork Gelatin.

Humans - any gender, ethnicity, size, age.

Dogs, Cats, and Horses - any breed, breed size, weight, gender.

Both Formulas:

- Are made in the USA
 - Are a 100% all natural products, and 100% grain free
 - Non-GMO
 - No Additives or Preservatives
 - Have a long expiration date (as long as the bag/container is kept sealed, in a cool, dry place. DO NOT refrigerate or freeze)
 - Helps maintain good health for all
 - Helps with faster recovery from injury or surgery
 - Are great for pre/post surgery
 - Can be an alternative for some surgeries
 - Helps with arthritis and/or repair arthritis issues
 - May be used to build, maintain, and strengthen tissue, cartilage, tendons, ligaments, bone, and muscle.
- For example; issues with ACL, knees, shoulders, back, neck, groin, elbows, hips, joints, and sprains.

*****(Humans)** May help with providing healthier hair strength and prevent graying by building proteins derived from the collagen, which will strengthen the hair follicles and help prevent follicle damage. May also help strengthen brittle nails by providing necessary collagen to encourage longer, stronger, healthier nails and cuticles.

- **100% Bovine Hydrolyzed Collagen Protein (Peptides Type I & III)**

- Collagen also plays a key role in restoring skin elasticity and hydration, which can help reduce fine lines, wrinkles and dryness. Amino acids in collagen can help improve uneven complexion by minimizing the appearance of dark spots and scars from acne and other skin issues.

- **Step Above Proteins** is safe to use during pregnancy and nursing for both humans and animals, as long as it was previously in use for a minimum of **(Humans)** 6-8 weeks prior to conception, **(Dogs, Cats, Horses)** 3-4 weeks prior to conception. (If ingested without having used prior to pregnancy or nursing, it may cause a disruption in your/their digestive systems)

*****Please ensure to consult** with your Physician, OBGYN, or Veterinarian prior to starting **Step Above Proteins** supplement while pregnant or nursing.

*****(Dogs)** also helps with Luxating Patellas, CCL, might be an alternative to surgery for Laryngeal Paralysis (LP) by strengthening the affected muscles, tissues, and cartilage supporting the respiratory tract. The gelatin also promotes healthier coats, aiding with or eliminating dull, flaky, brittle fur and soothing itchy, dry and scaly skin due to allergies or poor diets.

*****(Horses)** helps support and strengthen stressed ligaments and tendons for improving chronic lameness, and also helps enhance hoof health, including cleft cracks and prevention of cleft cracking. The gelatin also promotes healthier skin, working from the inside out to improve a healthier look for your horse's coat. Supporting for All-Around strength and stamina throughout their life.

All **Lab in the Sack** dogs/puppies are currently on this supplement from the time of conception, since it is safe for use during pregnancy, and should continue throughout their lives.

The use of **Step Above Proteins** is intended to help prevent health issues, maintain stability and strength of muscles, tissues, cartilage, tendons, joints, ligaments, bones, and to promote whole health well-being for all of our dogs.

Step Above Proteins Supplement also implements a healthier shiny coat, working from the inside out to aid with various skin problems such as dry, flaky skin, as well as dull or brittle fur.

Lab in the Sack is committed to the use of **Step Above Proteins** to guarantee our litters are a **step above the rest!**
